

ROUTE 6 – FROM THE SUPER C ALONG THE INNER RING

From the Super C along the inner ring

It's only a few minutes' walk from the Market Place to Aachen's university quarter.

Here, where specialised ideas are the prime commodity, there are also plenty of specialist shops. The remarkable Super C – the Service Centre of the RWTH Aachen University, which also has an excellent café – is the ideal starting point for a fascinating exploration along Templergraben and

Löhergraben, roads that trace the ring of the old inner town wall. Whether PCs and notebooks, sport bikes including repair services, or a suitable haircut – between the student quarter and the Jakobsviertel district you'll find real professionals at work.

When you take a stroll along the inner ring, you'll soon notice that between the modern university architecture and the idyllic old buildings there are lots of shop windows showing something new for you to discover.
